

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listing, of claims in the application:

Listing of Claims:

1-19. (Canceled)

20. (New) A method for creating seamless presentation information of picture data in a recording medium, comprising the steps of:

(a) recording picture data being received on the recording medium by grouping the data into objects; and

(b) selectively creating the seamless presentation information for each object based on the type of picture data being recorded.

21. (New) The method according to claim 20, wherein the seamless presentation information is not created for each object when the picture data is still picture data.

22. (New) The method according to claim 20, wherein the seamless presentation information is created for each object when the picture data is moving picture data.

23. (New) The method according to claim 22, wherein the seamless presentation information is included in navigation information pertaining to each object.

24. (New) The method according to claim 23, wherein the navigation information includes seamless presentation flag indicating whether a corresponding object is to be presented seamlessly with a previous object.

25. (New) The method according to claim 22, wherein the seamless presentation information includes at least one field of system clock reference.

26. (New) The method according to claim 25, wherein the at least one field of system clock reference comprises the last system clock reference field of the former of two successive objects and the first system clock reference of the latter of the two successive objects.
